

# Who really needs 5,724 pounds\* of pull-out strength?

**Maybe you do.** The GRK Caliburn is a very serious concrete screw. Just take a good look at those vicious threads. It delivers the industry's highest ratings for shear strength and pull-out strength. Anything less than the "Big Bang" itself, and this baby isn't likely to budge. So who needs this kind of ÜberGrade™ performance? Safe to say, you know who you are. Welcome to the club.
