RSS™ (LTF) LOG & TIMBER FRAME FASTENERS

- **Star Drive #30 drives fasteners with approximately 650 lbs. torque energy.**
- **Patented washer-type head with a reinforced shoulder**
Exceptionally strong, patented, washer type head produces extreme pressure pulling log down. Eliminating need to add washer as required for common lag screw; head can be countersunk 1 - 3" without pre-drilling a countersinking hole.
- **Case Hardened Steel**
Climatek™ coated, ACQ Approved
- **Complete and effective installation in one operation – eliminates pre-drilling for fasteners.**
- **CEE Thread**
Exclusive "CEE" thread slightly enlarges hole for screw shank and allows log to settle without restriction.
- **3/8" diameter x 4" thread length**
Very sharp rolled threads provide extreme pulling and withdrawal power.
- **Patented "W-Cut™"**
Cutting a groove for the next thread, reducing tension and pressure on fastener, providing ease of installation.
- **"Zip-Tip™"**
For quick and easy starting.
