The Industry's Toughest Screws

Adjustable Vinyl Window Screw

- Patented washer-head design
- Edge design under the head to capture the vinyl extrusion at penetration time
- Climatek® coating to reduce the possibility of corrosion
- W-cut thread design to bite into the underlying wood

When using the GRK Vinyl Window screw, pre-drilling is optional. However, a 1/8" pre-drilled hole does make the job easier and increases holding power. Either way, adjusting and leveling a vinyl window has never been easier.
