

Patented W-Cut Thread Design & Zip-Tip™

- No pre-drilling
- No hassles
- No strip drive
- Reduced splitting
- Easy start

The W-Cut is a patented thread design which acts like a saw-blade, cutting through any fibrous materials with ease. This unique design reduces the amount of torque required to install the screw, and maintains a high pull out strength. By cutting through, rather than pressing fibers aside, the W-Cut also reduces material splitting.

The W-Cut design is available on all GRK screws 1"1/4 and longer, except for Top Star™. GRK's Zip-Tip™ is designed for fast starts in any fibrous materials.
