

Cabinet™ Screw

- patented -

- Self-tapping
- W-Cut™ thread design
- Climatek™ coated
- Ideal for cabinets
- Vinyl siding installation

GRK's Cabinet™ screws are designed specifically for use in cabinet construction and installation. Cabinet™ screws are manufactured in a #8 gauge (4 mm) diameter.

These screws are thin enough to prevent most material splitting, while providing sufficient strength to guarantee a secure installation. The washer head design presses flush against any cabinet surface.

Builders have discovered, in some cases, short Cabinet™ screws can be used in vinyl siding installation.

Some sizes available in **PHEINOX™** Stainless Steel, see blue tabbed pages.
