## Cabinet<sup>TM</sup> Screw

- patented -

- Self-tapping
- W-Cut thread design
- Climatek<sup>TM</sup> coated
- Ideal for cabinets
- Vinyl siding installation

GRK's Cabinet<sup>TM</sup> screws are designed specifically for use in cabinet construction and installation. Cabinet<sup>TM</sup> screws are manufactured in a #8 gauge (4 mm) diameter.

These screws are thin enough to prevent most material splitting, while providing sufficient strength to guarantee a secure installation. The washer head design presses flush against any material surface.

Builders have discovered that short Cabinet<sup>TM</sup> screws can sometimes be used in vinyl siding installation.

Some sizes available in **PHEINOX<sup>TM</sup>** Stainless Steel, see blue tabbed pages.
