KameleonTM Composite Deck Screw

- Strong heads and Starhead recess
- Fiber trapping rings
- CEE Thread
- Self-tapping
- ClimatekTM coated

- patented -

GRK's KameleonTM screws are an excellent choice for composite and PVC decking applications. The underhead has saw-blade like cutting teeth that cut a perfectly clean hole into the decking.

The KameleonTM also features five to seven rings that have three indented fiber traps on each ring designed to trap fibers and eliminate the mushroom effect.

The CEE Thread feature enlarges the screw hole allowing the composite decking to settle easily, increases the screw's drawing strength, and reduces the friction on the screw shank which can result in lowering the driving torque.

The KameleonTM comes in six colors: Grey, Sage, Sand, Tan, Brown, and Redwood.

NOTE: Color samples shown are as close as possible to actual colors, within the limits of process color reproduction.
