washer head produces
a clean finish with increased
holding power**

**Case Hardened Steel with High
Tensile, Torque and Shear Strength**

**For use in interior or exterior applications
including metal siding, garage door trim
and even closet organizers**

The MSS™ was developed and patented based on the RSS™ model. This screws has an intergrated washer-head and is complemented by a rubber washer below the screw head. This feature also helps protect the washer from prolonged exposure form the sun for long lasting, secure siding applications. No pre-drilling is need due to the MSS™ tip design for thin sidings as well as thick studs. The MSS™ is powder coated for exceptionally high corrosion resistance. Available in #9 gauge with lengths from 1" to 2".
